### About J4 Systems

Since 1994, J4 Systems has been a network integrator specializing in turning technology into business value for our clients. We maximize the productivity of the technology that you currently own through professional IT consulting services and custom programming, with a focus on increasing your profitability. We provide Northern California businesses with professional technology consulting services that include, but are not limited to the following:

- Network Infrastructure, Design, Implementation and Support
- Server Virtualization and Consolidation, Virtual Desktop Infrastructure, Proof of Concepts
- Disaster Recovery Planning, Analysis, Design and Implementation
- Virtual Enterprise SAN Solutions and Best-in-class SSL and IPsec VPN Solutions
- Resource Optimization and Capacity Planning, Server Provisioning and Migration
- SharePoint Governance, SharePoint Customization, InfoPath Forms Development
- Application Development, Workflow Automation, Website Design
- Managed Services; Remote Systems Monitoring & Alerting, Vendor Management, Help Desk Support
- Per Incident Remote Help Desk Desktop Support, Tier 1 Citrix Support

We have the experience and expertise to develop IT road maps, network optimization strategies, create migration plans and much more. We will work with you in your quest to become or remain an industry leader within your market.

### Our Mission

At J4 Systems, our mission and values are to promote innovation through proven methodologies and help businesses reach their full potential through the development and implementation of technologies. Our customers receive value through our experienced team made up of network architects, system designers, managed service specialists, account specialists and software developers who provide a seamless experience aimed at making technology a partnering tool for businesses.
